

**YOU'RE
NEVER
ALONE.**

i-SERV

Its more than a service plan.
It's a lifeline.

World-Class Service. Wherever You Are. When You Need Us Most.

With i-Serv from Psion Teklogix, you're investing in more than a service plan. You're adding a fully staffed support team that will go to the ends of the earth to make sure your Psion Teklogix mobile-computing solution works at the peak of efficiency and reliability. Get the most out of your system, no matter where you go or what you do. When we say that i-Serv delivers world-class service, here's exactly what we mean:

Teknet Online Support

Online, real-time customer service:

- Instant RMA
- Interactive tracking

Teknet delivers online, real-time customer service that enables support any time, anywhere—from the corporate office to the most far-flung field location. With instant creation of return material authorization (RMA) and interactive tracking from start to finish, i-Serv keeps the most important information right at your fingertips. Teknet also offers access to a complete service history, including live help desk calls and comprehensive management of equipment in the field.

Repair-in-a-Flash Incident Disk

Exclusive RFID-enabled repair order:

- Fast-track repairs
- Fastest possible turnaround

An industry exclusive, the RFID-enabled i-Serv Repair-in-a-Flash Incident Disk allows the easiest, fastest repair experience possible. Once an RMA has been created using Teknet Online Support, the user includes the RFID disk in the box. The disk alerts the Psion Teklogix repair depot to fast-track the repair order. The Repair-in-a-Flash Incident Disk, purchased as part of your i-Serv plan, guarantees same-day attention, so that your device is returned to service as quickly as possible.

Live Help Desk Support

Phone or e-mail access to expert support:

- Certified Psion Teklogix employees
- Industry-leading response times

With i-Serv, the Psion Teklogix live help desk provides an industry-leading response time of 95 percent, with all calls addressed within 90 seconds. Every help desk professional is a trained Psion Teklogix employee, not a subcontractor. And each is a Microsoft® Certified Systems Engineer (MCSE) and a Cisco® Certified Network Professional (CCNP), to help provide concise, definitive solutions.

Authorized Repair Centers

Authorized repair centers in seven countries on five continents:

- On-site collection
- Guaranteed service

In the event that a device does need repair, i-Serv takes service to the next level, to minimize any potential work-site disruption. That means that Psion Teklogix customers around the world can count on a global stable of Authorized Repair Centers in seven countries: Canada, China, France, India, Singapore, South Africa and the United States. It means on-site collection of the damaged product and a promise of 96 percent accuracy in stated turnaround times.

i-Serv Quick Action Group

One-on-one service at your front door:

- Troubleshoot and repair
- Configure and enhance

When the experts at the help desk determine that you need a higher level of engagement, they can authorize the Psion Teklogix i-Serv Quick Action Group to travel to your destination for a one-on-one consultation. The i-Serv Quick Action Group is available anytime to travel anywhere, to quickly and efficiently resolve your problem. Whether it's to troubleshoot, repair, adjust, configure or enhance an existing infrastructure, the i-Serv Quick Action Group is there to help keep your business in the game.
