

IMPROVE SERVICE AND EFFICIENCY WITH THE ONLY TABLET THAT IS FLAT-OUT ENTERPRISE

THE MOTOROLA ET1 ENTERPRISE TABLET

Motorola's ET1 stands out in the marketplace, with ingredients that make it truly enterprise ready. Its Android operating system has been fortified with features that deliver enterprise-class security, flexibility and manageability. You get the same sleek design and ease of use common in consumer tablets, with the durability required for all day business use. The ET1 — a new class of tablet that is all pure business from the inside out.

Consumer styling with real business durability.

On the outside, the ET1 is every bit as elegant as today's most popular tablets. Yet the ET1 is built for everyday use, able to handle drops, spills, chilly winter temperatures, extreme heat and since the display is built with ultra strong Gorilla™ glass, it is virtually impervious to damage and able to flex when dropped without shattering or scratching.

Secure your data — period. Whether your data resides on an internal drive or on removable media it is encrypted. So you can easily secure sensitive information, such as credit card data and patient information, to help comply with industry and government regulations.

Built for multiple users with feature-level control.

No matter how many workers use a device throughout the day, with multi-user log-on each worker is automatically granted access to their own personalized workspace — the right applications and device features. Since managers know who is using the device at any time, task management is easier.

Add the features you need — when you need them.

With an expansion port and Bluetooth, you can add peripherals to meet changing business needs, from scanners for easy inventory takes to magnetic stripe readers for payment processing.

Work uninterrupted — power up and stay up.

While most tablets in the industry only offer rechargeable batteries, the ET1 has a removable battery that users can swap on the fly, preventing loss of data and productivity.

Easily build applications that run on the ET1 — and your other Motorola mobile computers.

The more operating systems you have, the more complex and expensive application development and maintenance can be. But with Motorola's RhoElements, you can easily create a single application that looks, feels and acts the same on Motorola mobile computers, regardless of whether it is built on the Android, Microsoft Windows Mobile or Windows CE operating system. Since you no longer need to create and maintain separate applications for each operating system, you can choose the right device for each worker — without increasing application development and support costs.

Easily manage your devices — from anywhere.

Whether you have one location or locations all around the world, Motorola's Mobility Services Platform (MSP) allows you to remotely stage, update, monitor and troubleshoot your Motorola mobile computers, driving the single largest mobility cost to an all-time low — everyday management.

Protect your investment from the unexpected

Unexpected repair costs can substantially increase the cost of your mobility solution. But with Service from the Start with Comprehensive Coverage, you get true business-class support for your tablet. This all-inclusive service covers normal wear and tear, internal and external components damaged through accidental breakage for both device and select accessories and operating system issues — keeping the ET1 up, running and in the hands of your users.

SPECIFICATIONS CHART

PHYSICAL CHARACTERISTICS

Dimensions	5.14 in. H x 0.98 in. D x 8.82 in. W 130.5 mm H x 25.0 mm D x 224.0 mm W
Weight	1.4 lbs./63 kg
Display	7 in. capacitive; 1024 x 600; 350 NIT; Corning® Gorilla® Glass
Touchpanel	Capacitive multi-touch
Backlight	Ambient light sensor
Keypad Options	Virtual; Bluetooth®
Expansion Capabilities	User accessible Micro SDHC card slot (up to 32GB); expansion module port
Expansion Modules	Integrated expansion port for 'snap-in' peripherals for Motorola and third party peripherals
Connectivity	Two USB interfaces: 1 USB 2.0 OTG connector (docking connector) and 1 USB 2.0 Host connector (expansion module port); HDMI out; communication via cradle and expansion ports; USB 2.0 host via expansion module
Notification	LED flash; bar code decode
Audio	Stereo speakers and dual microphones (one front and one rear-facing)

PERFORMANCE CHARACTERISTICS

CPU	Dual core 1GHz each plus graphics accelerator
Operating System	Android 2.3.4
Memory	1GB RAM, 4GB Flash plus 4GB microSD (total of 8GB flash memory); user accessible microSD card slot (supports up to 32GB)

USER ENVIRONMENT

Operating Temp.	32° to 122° F / 0° to 50° C
Storage Temp.	-4° to 158° F / -20° to 70° C
Drop Specification	Multiple 4 ft./1.2 m drop per MIL STD 810G
Sealing	IP54
Vibration	4Gs peak, 5hz to 2khz, 1 hour duration per axis
Thermal Shock	-4° F to 158° F / -20° C to 70° C rapid transition
ESD	15kv Air, 8kv contact, 2kv charge body
Humidity	10% to 95% RH (Non-condensing)
Development Tools	Motorola RhoElements for cross platform applications
Management Tools	Motorola Mobility Services Platform (MSP)

POWER

Battery	4620 mA rechargeable Smart Li-Ion; user replaceable; rapid resume
Battery User Profile	Ample power for a full shift

DATA CAPTURE

Rear Camera	For barcode scanning and image capture: 8MP auto-focus camera with user controllable LED flash, illumination and aiming; captures 1D and 2D bar codes, photographs, video, signatures and documents
Front Camera	Optimized for video collaboration and low lighting conditions
Video	720p video
Readability	9,000 ft. candles

COMMUNICATIONS

WLAN	802.11a/b/g/n
WPAN	Bluetooth 2.1 + EDR; integrated antenna
GPS	Autonomous GPS

SENSORS

Gyroscope	Maintains orientation based on principles of conservation of angular momentum
Motion Sensor	3-axis accelerometer that enables motion-sensing applications for dynamic screen orientation and power management
Ambient Light Sensor	Automatically adjusts display brightness, keypad and display backlight
Electronic Compass	Independent — does not depend on GPS

PERIPHERALS AND ACCESSORIES

Accessories include: 1-slot docking USB Charge Cradle; 4-slot docking cradle charge only; 4-slot battery charger; power supply; USB/charge cable; 2-way DC cable; hand strap; headset; AC line cord; DC cable; battery; customizable bezel

REGULATORY

For Regulatory information, please visit:
