Our range of Validators meet all
your End of Line compliance needs

Validator

THE COMPLETE END OF LINE VALIDATION SOLUTION

Acrovision's family of Validators has been created so that we can offer an 'off-the-shelf', cost-effective solution, yet with the flexibility of tailoring to each customer's specific needs.

Not only can the Validator Series ensure 100% quality compliance, but it can also offer a bespoke inspection system and front-end to ensure there are no foreign bodies in the products – avoiding any further EPWs and potentially removing any health risks to the public.

Validator

THE COMPLETE END OF LINE VALIDATION SOLUTION

End of line inspections have become a key focus within the Food, Drink & Tobacco Industries, as retailers are becoming more stringent about quality compliance and good manufacturing practice.

Incorrect labelling can result in poor customer satisfaction at best, or at worst, hefty fines or Emergency Product Withdrawals (EPW).

Validator 100

Stand-alone, 100% checks your barcode is correct and readable

Validator 200

Stand-alone, 100% validation of barcodes, text and patterns

Validator 300

Integrated 100% checks of barcodes, text, patterns and packaging quality

VALIDATION AND VERIFICATION ALL IN ONE!

Validator

THE COMPLETE END OF LINE VALIDATION SOLUTION

Acrovision has created a suite of in-line Package and Label Inspection Systems to monitor and control production lines; to ensure 100% correct product in the correct packaging with the correct data.

- Correct & readable barcode
- Correct & readable batch code / serial number
- Label applied & in correct position

Validator 100-Print

100% checks your barcode is correct and readable

Validator -Omni

100% validation and check of your barcode in a 360-degree orientation

The Validator OMNI will read & check your 1D /2D barcodes in a 360° orientation!

Validator 100

STAND-ALONE, 100% CHECKS YOUR BARCODE IS CORRECT AND READABLE

Three ways to program your barcode!

Validator 100-P

- Push-button, 'Show & Go'
- 1D and 2D barcodes

Validator 100-B

- Barcode reader
- Either scan a menu sheet or a sample product

Validator 100-T

- Touchscreen
- On-screen images and batch statistics

Validator100-Print

STAND-ALONE, 100% CHECKS YOUR BARCODE IS CORRECT AND READABLE

Designed to work on your
Desktop Printer

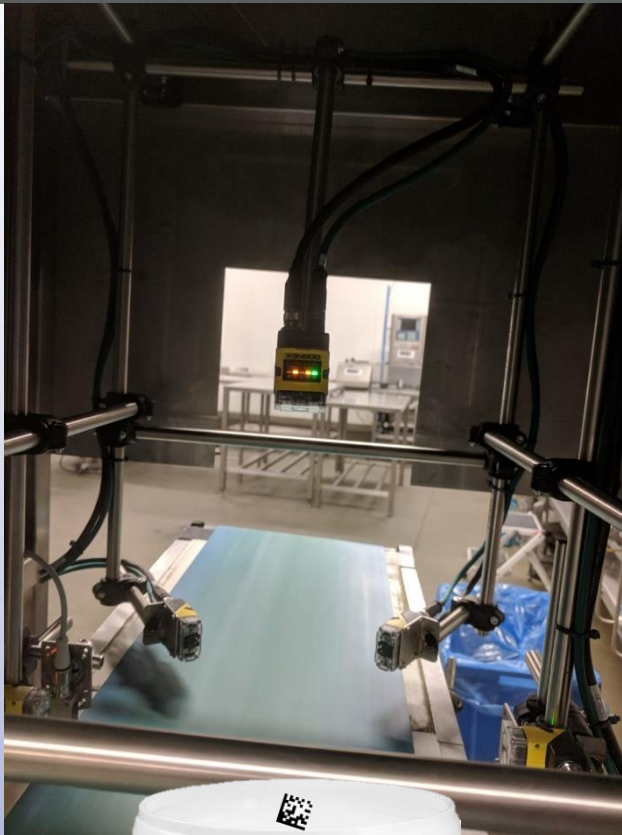

- 100% on-line check of all your printed labels
- Images on screen of last image and last 'reject' image
- Discrete output linked to the printer to stop on 'user-defined number of rejects'
- Real time statistics
- Bypass mode for when validation is not required
- Complete stand-alone system
- Full integration to desktop printer
- No read / wrong code output

Validator-Omni

360° CHECK THAT YOUR BARCODE IS CORRECT AND READABLE

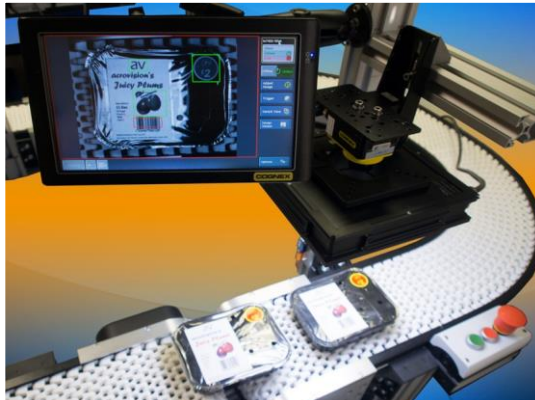

Check bottle tops, fill levels, correct packaging

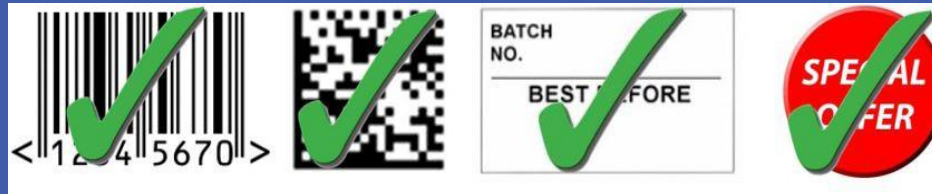

- 100% on-line check of all your product barcodes
- Images on screen of last image and last 'reject' image
- Real time statistics
- Multiple reader-array guarantees 360 degree reading of barcodes
- Bypass mode for when validation is not required
- Complete stand-alone system
- Configurable no read / wrong code output

Validator 200

STAND-ALONE, 100% VALIDATION OF BARCODES, TEXT AND PATTERNS

Check sell-by dates, use by dates, promotion labels

- Completely stand-alone – no PC needed
- Up to 7 different inspections per job
- Easy to configure and use
- User interface for live-image feedback / job selection
- Configurable digital outputs for rejects
- Easy creation of new product templates
- Multiple lines can be networked together

Validator300

INTEGRATED 100% CHECKS OF BARCODES, TEXT, PATTERNS AND PACKAGING QUALITY

Check bottle tops, fill levels, correct packaging

- Either stand-alone or integrated to a host system
- Select products from a central database
- Multiple password user levels
- Easy to configure and use
- User interface for live-image feedback / job selection
- PDF Report Engine
- Easy creation of new product templates
- Multiple lines can be networked together

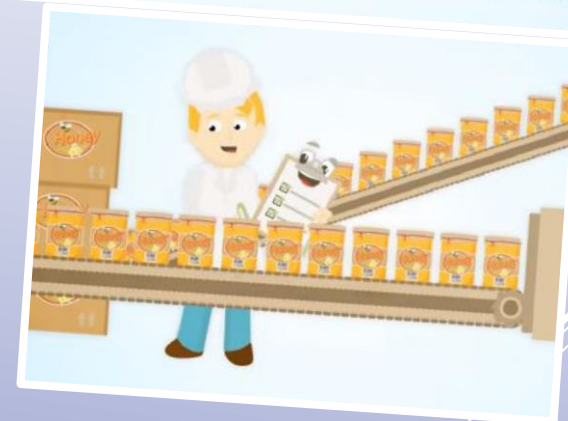

acrovision *validator*

IN ADDITION TO MONITORING AND REPORTING THE ASPECTS OF THE COMPLIANCE OF LABELS / PACKAGING, WE CAN ALSO PROVIDE:
