Are you ready for HMRC Vaping Product Duty?

What is the HMRC Vaping Product Duty?

HMRC's new Vaping Products Duty (VPD) charges £2.20 per 10ml on all UK vaping liquids from 1 October 2026, plus mandatory duty stamps on every retail unit. Thus bringing complex new registration, stamping and reporting obligations for manufacturers, importers and warehouses.

What is AcroTrace and how can it help you?

Acrovision's AcroTrace software automates VPD compliance, stamp tracking and reporting, so you can meet HMRC's requirements without the admin headache.

1 Scan

Scan barcodes at each packaging level (vape, carton, box, pallet) with Cognex DataMan hardware, capturing and linking product data. Reliably and line-ready

2 Aggregate & label

Automatically build and securely aggregate parent-child packing levels via the system, printing labels at every stage. Accurate and audit-ready.

3 Activate

Activate and aggregate identifiers via the SICPA gateway, generating the data record behind HMRC's and Cartor's stamps. Keeping you fully compliant and traceable.
